## Are you ready for solar power?

### SOLAR POWER EXTREMELY COST-EFFECTIVE

There are a number of incentive programs presently offered by federal and state governments and by utility companies.

#### Federal Government:

Extended for the next 8 years a 30% Tax Credit effective for Commercial solar installations after December 31, 2008.

#### State Government:

Texas allows a corporation or other entity subject to the State Franchise Tax to deduct the cost of a solar energy device from the franchise tax. Entities are permitted to deduct 10% of the amortized cost of the system from their apportioned margin.

The Texas Property Tax Code allows an exemption of the amount of the appraised property value that arises from the installation or construction of a solar or wind-powered energy device that is primarily for the production and distribution of thermal, mechanical, or electrical energy for on-site use, or devices used to store that energy.

#### Utility Companies:

Varies per service provider. Rebates may apply.

*Equivalent credits are available for cities and water districts!*

Renewable  
Energy

Mercer Controls is trained and ready to satisfy your needs. For example:

- > Remote flow or level monitoring equipment can operate on solar power alone .
- > Small pumps can be run on solar power.
- > Add solar power to a building or pumping facility and reduce the power company charge.
